daifuku07 left a comment

"static double measurement_range" must be initialized when doesn't using Runtime manager. Thanks.
But that value should be setting "200". By default, it is necessary to prevent that function from being executed.

Modify

5f44f90

```
measurement_range=MAX_MEASUREMENT_RANGE;  
(200)
```

andoh104 commented on Jul 2, 2017

Author

OK. I modified value to 200m.
And did other refactoring for performance improvement.
