Administrative

- [Previous meeting](#)
- **Meeting time:** Every second Wednesday, 10am UTC (alternating with Mapping WG)
- [WG Google Drive](#)

Attendees

► Chaired by David

Agenda

- Introduction of new attendees
- Progress report on **Cache-optimizing ring outlier filter** from Max
- Progress report on **PointPainting** from Shunsuke
- Review of [Project Board](#) and assignment

Discussion topics

- Announcement from Mitsudome-san
 - Update from the Software Working Group: change in CI/CD due to memory requirements
 - When reviewing PRs, please refer to: [link](#)
- Introduction of new attendees
 - Welcome to Max - working as an intern at TIER IV for the next 6 months, for the meantime in Sensing team on optimization of Nebula
- Progress report on **Cache-optimizing ring outlier filter**
 - Addressing  [ring_outlier_filter blows up my cache \(and yours too\)](#) [autoware.universe#3269](#)
 - [Slides](#)
 - Mitsudome: Any target duration times?
 - Max: Vincent ran this on a cache limited CPU and saw it was causing 20% CPU usage, so there was no target performance

usage

- These results are on an X1 extreme laptop
 - David: would be interesting to test on ARM CPU
 - David: how about elevation filtering as well as azimuth?
 - Max: we can check vertically as well almost for free as the elevation points are next to each other in memory
 - David Walmorth: How wide a bar will be filtered? What about an angled thin bar?
 - Max: Yes will be filtered out
 - David: ring outlier filter is about speed, but has limitations as identified - 2D convolution would be better for comprehensive filtering
 - Fatih: How long does it take for the entire pointcloud to be processed?
 - Max: 5ms to 3.5ms for entire pointcloud
- Progress report on **PointPainting**
 - [Video link](#)
 - [Video link](#)
 - [Video link](#)
 - Fatih: how is it different from ROI cluster fusion?
 - Miura: Point Painting is ML based rather than deterministic
 - Semantic segmentation head to YOLOX may be released next month
 - PointPainting adds projected YOLOX class label to each point
 - Merged into Autoware Universe  [Access PDF EBOOK EPUB KINDLE Michelin Romania Map 738 \(Maps/Country \(Michelin\)\) by Michelin !\[\]\(b71552d33dbf62adf5e5199a70ee02bf_img.jpg\) #4314](#)
 - Model is also released (JapanTaxi)
 - Project board
