Updates from developers

Autoware Labs

- [Autoware Labs Call for Participation Post](#)
- [Autoware Labs Project Board](#)
- Check if everyone has created an issue according to the previous discussion
 - [@estev](#): working on new point cloud concatenation package with [@lexavtanke](#)
 - Modify the issue to analyze the delay on point cloud concatenation synchronization
 - [@lexavtanke](#) to create issue by next week.
 - [@lchojnack](#): working on  [Release v1.0.0 AWSIM-Labs#15](#), but blocked by other issues.
- Go through members without tasks and assign them a task.
 - [@alpsarica](#): will take the task from next week. (interested in Planning/Sensing)
 - [@beginningfan](#) : Working on improving performance on autoware (CPU usage)
 - [@cyn-liu](#): Implement 3D detection: <https://github.com/HuangJunJie2017/BEVDet>

1 participant

- @mitsudome-r to check with Perception WG if there is anyone working on it in the past
- @SujayAmberkar: Expected to work on  [Make multi scene setup the default AWSIM-Labs#34](#), but is blocked by the release of AWSIM.
 - @SujayAmberkar could join the next Simulation WG call and discuss about the details of the task to be assigned.
- @ziri4k: Speed bump detection
 - Create an issue with list of tasks needed to close the issue. (e.g., find dataset with speedbumps, searching models to detect speedbump, implementing the detection module, etc.)

Distribution of new tasks

Action Items

- Developers to add their discussion items to the agenda for the next meeting
- Developers to share updates on their works in the next meeting
