- ☐ ☒ [Build only RViz plugin packages and split them into a separate container #5076](#)
- ☐ ☒ [Reorganize the `autoware.universe/common` packages #5077](#)
- ☐ ☒ [Reorganize the `autoware.universe/evaluator` packages #5078](#)

Create a build stage that includes only the [autoware.universe/sensing](#) and [autoware.universe/perception](#) packages. This is part of the second step in the Discussions post. Since separating sensing and perception into different containers might introduce performance issues, they will temporarily remain in the same container.
