

Testing the Dense Urban ODD Scenarios in AWSIM Labs using Scenario Simulator #5131

Unanswered

armaganarsln asked this question in **Feature requests**

armaganarsln on Aug 27 Collaborator

Scenario testing for Dense Urban ODD is ongoing and failed scenarios improved and fixed in the meantime.

To understand the improvement more clearly and see before/after performance I will like to request scenario testing in AWSIM as a last step after the changes are made and PR is ready for review.

To achieve this I will ask [@Aysenayilmaz](#) and [@ahmeddesokyebrahim](#) to create the initial prototype for some of the scenarios and start testing and publish the results in another discussion linking this feature request.

A preliminary work has been done under freespace parking planner could be checked here: [autowarefoundation/autoware.universe#8342](https://autowarefoundation.github.io/autoware.universe/#8342) ([comment](#))

We will keep updating this request in the upcoming weeks and share the scenarios and environment required for testing.
