Description

PRs of feat (feature), fix (bug fixes), and perf (performance) should be tested to ensure that they do not degrade even with small change templates. So I add "Test performed" in small change template.
Also, "Test performed" in small change is "Not applicable." as default to clarify whether the PR is tested or not.
This PR simply notes to authors while autowarefoundation/autoware-documentation#344 defines the detail of standard / small template.

Pre-review checklist for the PR author

The PR author **must** check the checkboxes below when creating the PR.

- [x] I've confirmed the contribution guidelines.
- [x] The PR follows the pull request guidelines.

In-review checklist for the PR reviewers

The PR reviewers **must** check the checkboxes below before approval.

@shmpwk btw, I think `refactor` and `perf` should sometimes use `standard` . So let's consider it a little more.

Could you update the PR title and the description? I think
it's old.

Add "Test performed" in small change template

@shmpwk I'm sorry, but I couldn't understand the background well. 😢
Could you please describe why you do rather than what you do?
